Program Changes

New this Fall (September 2022) - Enhanced EMR program boosts knowledge and skills to align with new regulations coming into effect. Come this Fall, Critt Care EMS will be incorporating new EMR competencies, including additional reserved acts and expanded curriculum to continue to meet the evolving needs of EMS in Manitoba. The longer and more in-depth EMR program is setting a new standard for practice directions in Manitoba and reflects the changes established by the profession's regulatory body (College of Paramedics of Manitoba). The new EMR program will include enriched information on topics such as anatomy & physiology, pharmacology, and medication administration. Expanded skills (including certain reserved acts under the Regulation) will be added along with additional high fidelity skills simulation. The new curriculum is designed to add to the practitioner's knowledge and skills as well as meet inter-provincial mobility requirements.
